Page 2

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach an apparatus and its method for checking the position of a mechanical part, particularly a free end of an elongate tool, among other features, comprising: a base carrying a mechanical support being moveable with respect to a frame along a longitudinal feed direction; an emitter generating a light beam along a trajectory transverse with respect to the longitudinal feed direction, and a sensor arranged along the trajectory of the light beam for providing signals indicative of reception and interruption of the light beam, the sensor and the emitter being coupled to the support; a transducer device for checking the relative position between the base and the frame; a processing, display and control unit for processing the signals from the sensor and identifying the relative position between the base and the frame; and a coupling mechanism adapted for enabling oscillations of the light beam with respect to the base substantially along a reference surface, and an device and transmission elements adapted for controlling the oscillations of the beam with respect to the base.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/563,512

Art Unit: 2878

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

I) Studebaker 3,471,234 discloses a surveying system having an optical device with rotation and oscillation operation.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Que T. Le whose telephone number is (571) 272-2438.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Epps Georgia, can be reached on (571) 272-2328. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
